

# Datemats exhibition is moving to the School of Design of Politecnico di Milano

Datemats Project continues its physical exhibition presenting some outputs of the project on the last exhibition named “**Datemats, designing with emerging materials and technologies**”.

The installation aims at demonstrating how the **emerging of new materials and technologies is fostering creativity and stimulating innovation processes**, and how the knowledge transfer related to emerging materials and technologies (EM&Ts) from universities and research centers to professionals and enterprises is crucial to **speed up their introduction and uptake into the market**.

By entering the **School of Design**, the visitors are offered a deep dive into the **4 Datemats EM&Ts areas introducing the latest updates of material innovation and design!**

Nanomaterials

Interactive Connected  
Smart Materials,  
Wearable based (ICS)

Advanced Growing  
Materials

Experimental  
Wood-Based  
Materials

**WHEN:**  
March 11 – April 1<sup>st</sup>

**WHERE:**  
**School of Design,**  
Via Giuseppe Candiani, 72  
20158 Milano MI

Organized and curated by:  
**Datemats partners**

Coordinated by:  
**Department of Design**
